I have installed and learned some basic feature of Fireworks. It is a pretty good program and I now realise that I have a lot more to learn about logo design.

I am looking for good books on the following 3 topics:

- Understanding Fonts
- Good Logo Design Techniques
- FireworksThe Principles of Beautiful Web Design

There is a lot more to fonts than most people realise I found this one page that describes some basic items about logos: <http://www.logo-design99.com/text-design.htm> This page goes over Serif vs. San-Serif and Kerning. I already had a good concept of serif vs. San Serif. Kerning I was not as familiar with.

On the last topic does anyone know what the best fireworks books are? One designer that I know gets all of his information from web tutorials. This may work for me later but right now I would like to have the information directly in front of me in the form of a book,

Here is a book that may cover the overall design concepts that I am looking for.
